

# Hamburg & Winans Lake Road Detour

## Closure Expected June 15

### Project Details:

Road and bridge work at the intersection of Hamburg Road and Winans Lake Road will begin on June 15, 2009. The intersection of Hamburg Road at Winans Lake Road will be closed. The nearby Hamburg Road Bridge over the Huron River also will be closed. Winans Lake and Hamburg Road traffic will be detoured. Access to Van Antwerp Road will be via Hamburg Court.

The intersection repair work consists of construction of a modern roundabout intended to ease the frequent traffic back-ups, especially on Winans Lake Road. The roundabout will be a single lane facility, similar to the Kensington and Jacoby intersection located by the General Motors Proving Grounds. The intersection will be re-opened in mid-August.

The bridge repair work includes deep concrete deck patching, steel repair and painting, and replacing the bridge railing. This will preserve the existing bridge and extend its service life. The bridge will be re-opened by mid-September.
